- Python Scripting
- Rails Support
- PHP Support
- NodeJS Development
- HTML5 & CSS3

Work Experience

System Administrator, SpinDance

August 2014–present

Monitoring—Quickly recognizing system abnormalities and addressing errors before our customers notice any issues. Also designing and maintaining a set of dashboards to track server metrics.

Automating—Instructing computers on how to perform repetitive tasks using common scripting languages and popular automation tools for testing and code deployments.

Supporting—Promptly responding to customer requests for system modifications, code deploys, and sql queries.

Setup Crew, Prince Conference Center

October 2007–September 2013

Versatility—Set up tables, chairs, and A/V equipment, including laptops, microphones, speakers, and recording equipment; cleaned public areas; drove airport shuttles; trained to work at the Front Desk

Customer Service—Learned to anticipate client demands in order to provide them with an ideal working experience

Independence—Frequently worked with little or no supervision and was complimented on my thoroughness and work ethic

Education

Calvin College, Grand Rapids, MI

Bachelor of Arts, Graduated May, 2011 Majored in Mathematics and Philosophy; GPA: 3.497 Excelled in courses on Java, Ruby on Rails, Adobe Flash, linear algebra, computational logic, and symbolic logic
