Work Responsibilities & Skills

System Administrator, SpinDance   August 2014–present

Monitoring—My highest priority is quickly recognizing system abnormalities and addressing errors before our customers notice any issues. Monitoring tools:

- Zenoss server
- ELK cluster
- New Relic

Automating—I also instruct computers on how to perform repetitive tasks using common scripting languages, as well as popular automation tools for testing and deployments:

- BASH
- Python
- Rspec
- asdf
- Ruby
- Chef
- Jenkins

Setup Crew, Prince Conference Center   October 2007–September 2013

- Set stuff up
- Tore stuff down

Additional Skills
